

We can divide large numbers using long division.

Watch the video to see how we divided 426 by 25

Then see if you can work out the answers to the calculations below

Remember the number that is left over after the last subtraction is your remainder.

Try it at home with these calculations.

1. $544 \div 33 =$
2. $138 \div 38 =$
3. $334 \div 41 =$
4. $261 \div 27 =$
5. $456 \div 41 =$
