

When we are given a calculation, we can often estimate the answer before we work it out.

Here we can see how a calculation can be rounded up to make it easier to work out the answer.

$$139 \times 6$$

$$150 \times 6 =$$

Try rounding up the calculations below and see if it helps your child to work out the answers.

1. $99 \times 5 =$
2. $121 \times 6 =$
3. $47 \times 9 =$
4. $194 \times 3 =$
5. $77 \times 7 =$
