

When we are multiplying decimals the total number of digits in the question, after the decimal point, is also the total number of digits after the decimal point in the answer.

Have a go at working out these multiplication calculations following that rule.

$$0.25 \times 3 = 0.75$$

$$0.35 \times 4 =$$

$$0.120 \times 3 =$$

$$0.05 \times 1.2 =$$

$$0.04 \times 1.5 =$$
